Sefrina Pradhan

Frontend Engineer

Auburn, Sydney, NSW | +61 413 679 261 | sefrinapradhan@gmail.com

LinkedIn | *Portfolio*

PROFESSIONAL SUMMARY

Product-minded **Software Engineer** with 3+ years of experience specializing in **React** and **TypeScript** to build high-impact, user-centric web applications. Proven track record in migrating legacy systems to modern frontend architectures and developing **AI-augmented creative tools**. Passionate about bridging the gap between design and engineering through reusable component libraries and accessible UI/UX.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Design & UI:** Figma (Prototyping), Design Systems, Responsive Design, Accessibility (WCAG)
- **AI & Innovation:** LLM API Integration, AI-driven Text/Video processing
- **Backend & API:** .NET 8, REST APIs, Azure Functions, Supabase, PostgreSQL
- **Testing & DevOps:** Jest, React Testing Library, Azure DevOps, CI/CD (YAML), Git

PROFESSIONAL EXPERIENCE

Full Stack Developer – Standards Australia

2024 – Current | Sydney, New South Wales

- Played a key role in migrating a large-scale production Angular application to React and TypeScript, while developing a library of reusable UI components that improved frontend architecture and accelerated feature delivery cycles.
- Implemented business workflows across React frontend and .NET backend services, translating product requirements into reliable technical solutions.
- Contributed to backend modernisation by migrating APIs from .NET 4.8 to .NET 8, improving scalability and performance.
- Replaced Salesforce IAM with **Auth0 (OIDC/SAML)**, successfully reducing user login latency from **minutes to seconds**.
- Developed and maintained unit and component tests using Jest and React testing Library to improve release confidence.
- Owned support and feature delivery across **3–4 production applications**, diagnosing and resolving live issues while maintaining system stability in a high-demand environment.
- Collaborated with product owners, business analysts, QA engineers and developers using Agile metholodgies to deliver production features.

IT Graduate – Standards Australia

2023 – 2024 | Sydney, New South Wales

- Designed and developed an internal scheduling and planning application using React, TypeScript, Azure Functions, and .NET to support workshop planning, staff availability, and leave management
- Led the migration of the corporate public website from WordPress to **Webflow**, optimizing content workflows and frontend usability.
- Managed deployments through Azure DevOps CI/CD pipelines using YAML workflows, supporting reliable deployments across environments.
- Designed UI workflows and high-fidelity prototypes in Figma, collaborating with stakeholders to translate business requirement into intuitive user experiences.

PROJECTS

Poetry Platform – Gallery of words | 2026

- Designed and built a full-stack web application featuring a **writing companion** with emotion detection, rhyme suggestions, and style rewrites, utilizing JavaScript to simulate LLM interactions for rapid prototyping.
- Architected a robust service layer pattern to decouple the UI from backend calls, allowing for seamless future integration of AI APIs.
- Integrated Supabase (PostgreSQL + REST API + Row Level Security) as the backend, eliminating the need for a custom server.

VIORA – AI Video Speech-to-Text & Summarisation Tool | 2025

- Developed a React + TypeScript application integrating AI APIs to generate video transcripts and summaries
- Designed and implemented user flows for upload, transcription, summarisation, and export
- Designed modular frontend architecture to handle complex user flows for media uploading and real-time content processing.

EDUCATION & AWARDS

Bachelor of Information Technology
King's Own Institute | 2021 – 2023

Awards

- **Above & Beyond Award – Nov 2024** | Standards Australia
- **Academic Performance Award – Oct 2023** | King's Own Institute
