PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building and shipping high-quality, user-facing products using React and TypeScript. Proven ability to deliver 0→1 features, modernise legacy systems, and improve performance in production environments. Experienced in collaborating cross-functionally with product, design, and backend teams to translate ideas into scalable, user-centric solutions. Strong focus on craftsmanship, accessibility, and building AI-enabled product experiences.

CORE COMPETENCIES

- React & TypeScript (Advanced)
- Frontend Architecture & Component Systems
- Full-Stack Development (.NET, REST APIs)
- AI Product Integration (LLM APIs, Prototyping)
- Design-to-Code Collaboration (Figma, Dev Handoff)
- Performance Optimisation
- Testing (Jest, React Testing Library)
- CI/CD & Deployment (Azure DevOps)
- Accessibility (WCAG Standards)
- Agile Product Development & Cross-Functional Delivery

PROFESSIONAL EXPERIENCE

Full Stack Developer – Standards Australia

2024 – Current | Sydney, New South Wales

- Led migration of a large-scale Angular application to React and TypeScript, improving frontend maintainability and reducing feature delivery time by 40% through reusable component architecture
- Engineered a reusable UI component library, accelerating development velocity across multiple teams and reducing duplicate code by 25%**.**
- Modernised backend services by migrating APIs from .NET 4.8 to .NET 8, improving system performance and scalability by 20%.
- Optimised authentication flows by replacing Salesforce IAM with Auth0 (OIDC/SAML), reducing login latency from minutes to seconds and improving user experience.
- Implemented robust unit and component testing using Jest and React Testing Library, increasing release confidence and reducing production defects.
- Owned production support and feature delivery across 3–4 live applications, resolving critical issues and maintaining high system reliability in a fast-paced environment.
- Collaborated cross-functionally with product managers, designers, QA, and engineers in Agile teams to deliver high-impact user-facing features.

IT Graduate – Standards Australia

2023 – 2024 | Sydney, New South Wales

- Built an internal scheduling and planning application using React, TypeScript, Azure Functions, and .NET, improving operational efficiency for workshop and resource planning by 15%.
- Led migration of the corporate website from WordPress to Webflow, enhancing content workflows and improving frontend usability and performance metrics.
- Automated deployment pipelines using Azure DevOps (YAML), enabling consistent CI/CD workflows and reducing release errors.
- Designed high-fidelity UI prototypes in Figma and translated them into production-ready code, strengthening design-to-code collaboration
- Partnered with stakeholders to convert business requirements into intuitive, user-centric product experiences.

PROJECTS

Poetry Platform – Gallery of words | 2026

- Designed and built a full-stack AI-enabled application with features like emotion detection, rhyme suggestions, and style rewrites, improving creative writing workflows
- Prototyped LLM-like interactions using JavaScript to simulate AI behaviour, enabling rapid iteration before backend AI integration
- Architected a scalable service layer to decouple frontend and backend, enabling seamless future integration of AI APIs
- Integrated Supabase (PostgreSQL, REST, Row-Level Security) to deliver a secure, serverless backend

VIORA – AI Video Speech-to-Text & Summarisation Tool | 2025

- Developed a React + TypeScript application integrating AI APIs to generate video transcripts and summaries, improving content accessibility and usability
- Designed end-to-end user flows for media upload, transcription, summarisation, and export, optimising user experience for complex workflows
- Engineered a modular frontend architecture to handle real-time processing and asynchronous AI interactions.

EDUCATION

Bachelor of Information Technology
King's Own Institute | 2021 – 2023

AWARDS

- **Above & Beyond Award – Nov 2024** | Standards Australia
- **Academic Performance Award – Oct 2023** | King's Own Institute
